

Ambachtsheer is a long time strategic advisor and commentator on pension funds and the director of the Rotman International Centre for Pension Management, a research centre at the Rotman School of Management at the University of Toronto.

Organized around seven broad themes, ranging from the politics and governance issues of pensions to the benchmarking of results, the book shows how troublesome agency issues can be resolved and how new research findings from the fields of behaviour finance and investment lead logically to TOPS. This new pension design avoids the pitfalls of the existing defined benefit pension plans such as musical chair risk shifting games as well as the problems of defined contribution plans which include agency and longevity risk baggage.

"When Keith Ambachtsheer puts his keen mind to work on a problem, watch out! Here he exposes today's fragile arrangements for the most serious social dilemma of our times - financial retirement. Then he provides a compelling and powerful set of solutions. His writings are essential reading for all who care about the future of American living standards," says Peter Bernstein, Founder and President, Peter L. Bernstein Inc, and author of Capital Ideas and Against the Gods.

Launches for Pension Revolution were held in February in Toronto and New York and in March in Edinburgh and Amsterdam.

Further information about Keith Ambachtsheer and the Rotman International Centre for Pension Management is online at:
